

Curriculum Vitae

Frederico Miguel Cruz Dinis

Portuguese (1974) lecturer, researcher, AV performer, sound artist and intermedia composer, that seeks to represent a figurative space-time, combining sound and visual narratives with unusual spaces, often developed in collaboration with visual artists, dancers, choreographers, performers, musicians and curators. His work has been embraced by museums, concert halls and public spaces and events in Portugal, Spain, Austria, Finland, South Korea and Brazil.

Currently he is a Lecturer in Multimedia & Arts at Escola Superior Gallaecia (Vila Nova de Cerveira, PT) and he is also a PhD candidate in Art Studies (Specialty in Theatrical and Performance Studies) at University of Coimbra (PT), with the aim to foster audiovisual processes that move between past and present, community and individual, and between specific types of performativity, exploring the confluence between sound and visual media. He holds a degree in Computer Engineering from the University of Coimbra.

He is a researcher of the Centre for 20th Century Interdisciplinary Studies of the University of Coimbra (Coimbra, PT). As a researcher his practice-as-research projects focus on specific places analyzing, throughout the research and creation process, the role of memory in the configuration of individual and collective identities, seeking to reflect on the importance of site-specific and sense of place, and the relationship between performativity and memory representation, taking as starting point the interaction with the places and the appropriation of memories and archives, and exploring their sound and visual aspects. He is a Member of EASTAP - European Association for the Study of Theatre and Performance (Paris, FR) and Member of Ob.EMMA - Electronic Music and Media Art Observatory at CITCEM - Transdisciplinary Research Centre "Culture, Space and Memory"/University of Porto (Porto, PT).

He has developed more than 30 site-specific practice-as-research projects and presented the results of these projects at several conferences and events. His sonorities are hybrid and integrate a set of influences: ambient, drone, soundscape, soft noise, and minimal electronic, and his compositions fall back on field recordings, atmospheric textures and evolving patterns, marked by fragmented rhythms. As a solo artist, he has released seven electronic ambient music works.

He is the author of the book "Sinuous Sensation Hypnotic Emotions: Visual Ambiences" (Flying Thought, 2018) and several scientific papers (peer-reviewed) and book chapters (peer-reviewed) on themes related to Art & Technology, Cultural Studies, Digital Arts, Memory Studies, Musical Studies, New Media Arts, Practice-as-Research Methods, Site-Specific Arts, Sociology of the Arts and Theatre & Performance Studies.
